

Advanced Service for Oracle Cloud Infrastructure

Implement, operate, and optimize Oracle Cloud Infrastructure securely and cost-effectively in commercial, government (FedRAMP, EU Sovereign, Dedicated Region), and multi-cloud environments.

The Value of DXC Technology

- ✓ Unlock the value of seamless 24x7 OCI services with DXC as an audited Oracle Cloud Solutions Provider (CSP).
- ✓ Use leading non-native Oracle tools and building blocks to manage OCI as any other hyper scaler environment.
- ✓ Experience efficiency with DXC's Platform X™ and detect and resolve issues swiftly, empower IT teams, and save costs.
- ✓ Control cloud usage and costs with DXC's Cloud Economics Management Dashboard. Gain insights and align budgets effortlessly.
- ✓ Ensure robust security with DXC's Dedicated Security practice, covering all security aspects from threat intelligence to compliance.
- ✓ Reduce costs. DXC is a global strategic partner in the Oracle CSP Program, which provides OCI discounts, allows for a pay-as-you-go model rather than an upfront capacity purchase, and maximizes Oracle Support Reward incentives.

DXC offers managed services for Oracle Cloud Infrastructure (OCI) customized to your specific needs.

6x

Certified Oracle Cloud Solutions Provider (CSP) for 6 years

24 x 7

Proactive support

50+

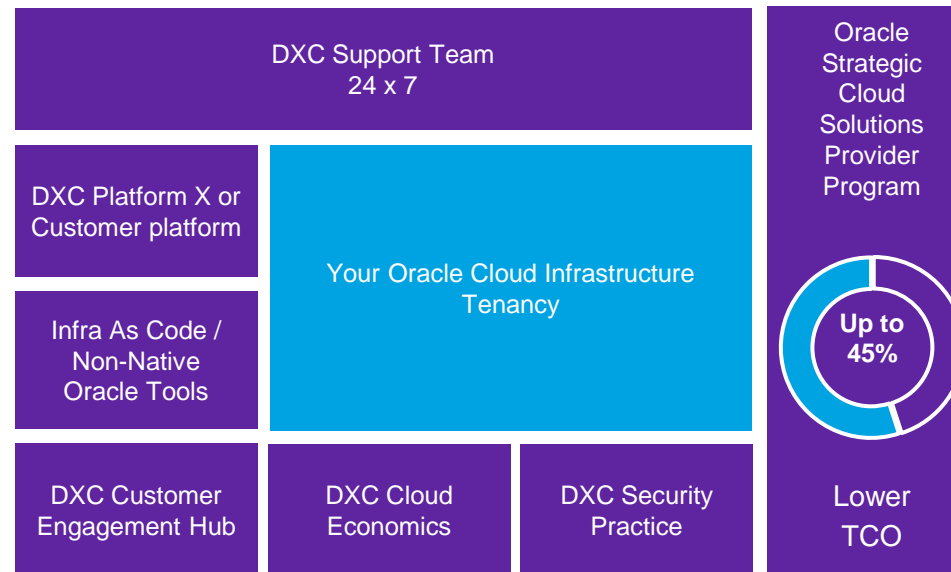

OCI Customer Tenancies Managed

Global Oracle Application & Technology Specialists

DXC's deep OCI experience, your competitive advantage

- DXC supports all of Oracle's IaaS and PaaS services including:
 - Autonomous DB
 - Generative AI PaaS
 - NVIDIA GPU-powered instances
- DXC has deep experience with heavily regulated industries such as Government and Defense, Healthcare, and Financial Services.

Success stories

National Healthcare Supply Chain Organization in Europe

DXC runs an ecosystem on OCI with Oracle Integration Cloud, Visual Builder, APEX, autonomous data warehouse, WAF, and many more.

DXC services include implementing and supporting SaaS extensions, PaaS Integrations, and Oracle Cloud Infrastructure through several manageable projects iteratively releasing value each quarter.

Global Materials Manufacturer in the US

High-performance fabrics manufacturer transitioned their HCM/Payroll and Data Warehouse operations to Oracle Cloud Infrastructure platforms, utilizing an Infrastructure as Code methodology. This migration included successful adoption and maintenance of OCI, autonomous database, PeopleTools, and Peoplesoft image upgrades. DXC currently maintains the OCI tenancy, including a comprehensive Disaster Recovery Failover environment and application managed services.
